About Sumaiya Traders

Sumaiya Traders is a specialized Android application development company dedicated to building high-quality, scalable, and user-centric mobile solutions. We focus exclusively on the Android ecosystem to deliver deep expertise, faster development cycles, and outstanding performance for our clients.

From startups launching their first MVP to established businesses needing robust enterprise Android applications, we partner with you to turn ideas into powerful mobile products that users love.

Our Mission

To empower businesses with premium Android applications that drive growth, enhance user engagement, and deliver measurable results. We believe in clean code, modern architecture, and long-term partnership with every client.

Why Android Only?

- Deep specialization & expertise
- Faster delivery & lower cost
- Native performance advantage
- Better optimization for Android
- Focused team & tools mastery
- Strong Play Store optimization

What Makes Us Different

- 100% focus on Android — no divided attention between platforms
- Modern tech stack: Kotlin, Jetpack Compose, Clean Architecture, MVVM
- Transparent process with regular demos and clear communication
- Post-launch support, Play Store optimization & continuous improvement
- Competitive pricing without compromising on quality or security

Our Services

We are more than a generic agency. We align with your business goals.

Custom Android App Development

End-to-end native Android applications built with Kotlin and modern architecture. From concept to Play Store launch.

MVP Development

Rapid development of Minimum Viable Products so you can validate ideas quickly and attract early users or investors.

Team Augmentation

Skilled Android developers who integrate with your existing team. Flexible engagement models for short or long-term needs.

App Maintenance & Support

Ongoing updates, bug fixes, performance optimization, security patches, and feature enhancements after launch.

UI/UX for Android

Material Design 3 compliant interfaces, smooth animations, and delightful user experiences optimized for Android devices.

Play Store Optimization

ASO strategies, listing optimization, screenshot design, and release management to maximize visibility and downloads.

Note: We specialize exclusively in Android applications.

No iOS development — pure focus for superior quality and faster delivery.

Our Expertise

Languages & Frameworks

Kotlin

Java

Jetpack Compose

XML Views

Coroutines

Flow

Architecture

MVVM

Clean Architecture

MVI

Repository Pattern

Dependency Injection (Hilt/Koin)

Backend & APIs

Retrofit

OkHttp

REST APIs

GraphQL

Firebase

Room Database

Tools & Quality

Android Studio

Git / GitHub

CI/CD (GitHub Actions)

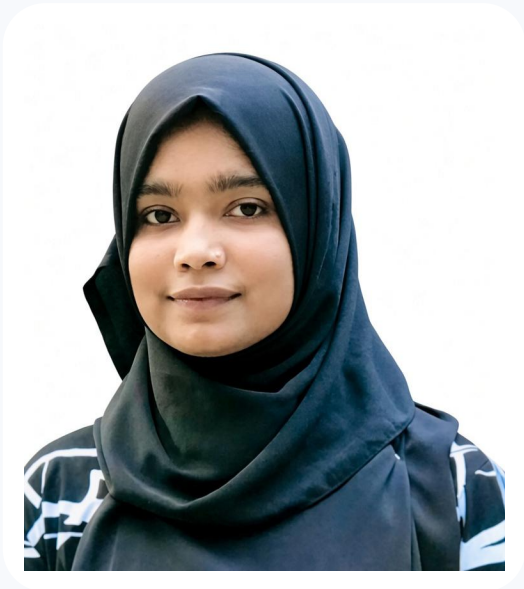

Unit & UI Testing

Play Console

We follow Google's official Android best practices and Material Design guidelines

to ensure your apps are future-proof, secure, and highly performant.

Key Player

Sumaiya

Founder & Lead Android Developer

Sumaiya is a passionate Android developer and entrepreneur with deep expertise in building production-ready mobile applications. She leads Sumaiya Traders with a clear vision: to deliver high-quality Android solutions that help businesses grow and users enjoy seamless experiences.

Her hands-on approach, attention to detail, and commitment to modern Android development practices ensure every project meets the highest standards of performance, security, and user experience.

Core Strengths

Android Native

Kotlin, Java, Jetpack

Architecture

Clean, MVVM, MVI

UI/UX

Material Design 3

Leadership

Client Communication

Delivery

On-time & Quality

Support

Long-term Partnership

Selected Projects

ShopEase

E-Commerce Android App

Full-featured shopping app with product catalog, cart, wishlist, payment gateway integration, order tracking, and push notifications.

Kotlin • Jetpack Compose • Firebase • Room • Retrofit

SecureVPN Pro

VPN & Privacy Android App

High-speed secure VPN application with multiple server locations, kill switch, no-logs policy, split tunneling, and advanced encryption protocols.

Kotlin • OpenVPN • WireGuard • Jetpack • Coroutines

TaskFlow Pro

Productivity & Team Management

Task management with teams, deadlines, file sharing, real-time updates, analytics dashboard, and offline-first support.

Kotlin • Clean Architecture • Room • WorkManager • Hilt

FoodExpress

Food Delivery Android App

Restaurant listing, real-time order tracking, multiple payment options, ratings & reviews, and driver location sharing.

Kotlin • Jetpack • Google Maps • Firebase • Stripe

Our Process

A transparent, collaborative approach from idea to Play Store.

01

Discovery & Planning

Understand your goals, users, and requirements. Define scope, timeline, and success metrics.

02

UI/UX Design

Wireframes, high-fidelity designs, and interactive prototypes following Material Design 3.

03

Development

Agile sprints with regular demos. Clean, tested, and well-documented Kotlin code.

04

Testing & QA

Unit tests, UI tests, device compatibility, performance, and security checks.

05

Launch

Play Store submission, listing optimization, and smooth release management.

06

Support & Growth

Post-launch monitoring, updates, new features, and continuous improvement.

Ready to build your next Android app?

We deliver quality, transparency, and results — on time and on budget.
